

SAINT PHILIPS CHAPEL STREET

VENUE HIRE

THE BUILDING

Built in 1825, Saint Philips Chapel Street is a historic Grade II listed building designed by architect Robert Smirke.

This building is currently home to a vibrant church community and over the years has been host to many arts, culture and music events. A place for creativity to thrive in the heart of Manchester.

The building sports incredibly grand architecture with a gorgeous stained window centre stage. The venue is a large statement and a cultural touchpoint on Chapel Street

Visionary local artist L.S. Lowery drew the church multiple times using it as a muse to create works and to anchor his art in the local area. We aim to continue the rich history of art and creativity with the events we host and support.
